# NutriSolve<sup>™</sup>

## A BIOPRO MICRONUTRIENT

### Benefits of Use:

- Supply of micronutrients (B, Cu, Fe, Mn, Mo, Zn)
- Rapid response from foliar uptake
- Increased uptake from citric acid chelation
- Increased turf vigor
- Enhanced color without additional nitrogen
- Improves overall turf and plant quality
- More vibrant foliage

### Problems Addressed:

- Wide range of micro nutrient deficiency symptoms
- Sand based systems where micronutrients are inherently low
- Lack of nutrient availability due to extremes in soil pH

NutriSolve with SeaXtra is a blend of boron, copper, iron, manganese, molybdenum, zinc and seaweed extract. It is designed as a foliar spray to correct or prevent a range of micronutrient deficiencies without the addition of nitrogen. The copper, iron, manganese and zinc are chelated with citric acid to stabilize nutrients and enhance their uptake. It is an excellent product for sand based systems with low CEC's and nutrient holding capacity. NutriSolve has also been engineered to address the lack of nutrient availability associated with pH extremes.

## APPLICATION INSTRUCTIONS:

NutriSolve can be applied through fertigation, foliar spray, soil drench, or deep root injection. It can be applied alone or tank mixed with other products. Shake well before using.

## GREENS AND TEES:

Apply 6 oz. of NutriSolve diluted in 1 gallon water per 1,000 sq. ft. (2 to 4 gallons in 40 gallons of water per acre) per month. To maximize performance, rates may be split into weekly or bi-weekly applications.

## FAIRWAYS, LAWNS, ATHLETIC FIELDS AND OTHER TURF:

Apply 6 to 12 oz. of NutriSolve diluted in 1 gallon of water per 1,000 sq. ft. (2 to 4 gallons in 40 gallons of water per acre) per month. To maximize performance, rates may be split into weekly applications.

## ORNAMENTAL SHRUBS AND EVERGREENS:

Mix 2 gallons of NutriSolve in 100 gallons of water and spray foliage to the point of runoff. Best results will occur when applied to actively growing foliage during periods of high humidity and low plant stress (early mornings, late afternoons and cloudy days are preferable to hot, dry conditions).

## TREES AND PALMS:

Mix 1 pint to 1 quart of NutriSolve in 100 gallons of water. Apply 5 gallons of finished solution per inch DBH (Diameter at Breast Height). The solution may be applied through deep root injection or soil drench.

## COMPATIBILITY

Perform a standard "jar test" to check compatibility with other products before mixing.

## WARNING

CAUSES SERIOUS EYE IRRITATION. CAUSES SKIN IRRITATION HARMFUL IF SWALLOWED. MAY CAUSE RESPIRATORY IRRITATION.

**PRECAUTIONARY STATEMENTS:** Keep out of reach of children. Read label before use. If medical advice is needed, have product container or label at hand. Avoid breathing mist or spray. Use only outdoors or in a well-ventilated area. Do not get in eyes, on skin, or on clothing. Recommended PPE: Wear protective gloves, protective clothing, eye protection, face protection, and other personal protective equipment as required.

WARNING: This fertilizer contains Boron (B) and Molybdenum (Mo). It is intended for use only on directed crops. Its use on other crops or under conditions other than those recommended may result in serious crop injury. The application of fertilizing material containing Molybdenum (Mo) may result in forage crops containing levels of Molybdenum (Mo) which are toxic to ruminant animals.
